Fail - points/blocking	Changes should be made in the footer of the home page because of the layout (The text should be below the icon of the Instagram but in this all is together therefore it's not clear and the icon is very big)	In the search option of the home page information are not provided properly and the filters are not properly organized

Fail -points/blocking	A check box is not present in the cart page for each item therefore we can't purchase a single item in the cart page if we want to purchase, we have to select all or else we have to remove the items from the cart which is not intended to purchase.	To purchase an item, we have to always to add to the cart there is no separate button to purchase items before adding to the cart
